

## 74' Mobile Skimmer

Rozema Boat Works was recently awarded a contract to build two 74' (22m) Mobile Skimming Vessels and one 65' (20m) Mobile Skimming Vessel for WCMRC, based in Burnaby, BC, Canada. The new vessels will be the flagships in WCMRC's expanding fleet due to expanding traffic in Vancouver labor, the TMPE expansion project, and the Canadian government's mandate to improve oil spill response and readiness.

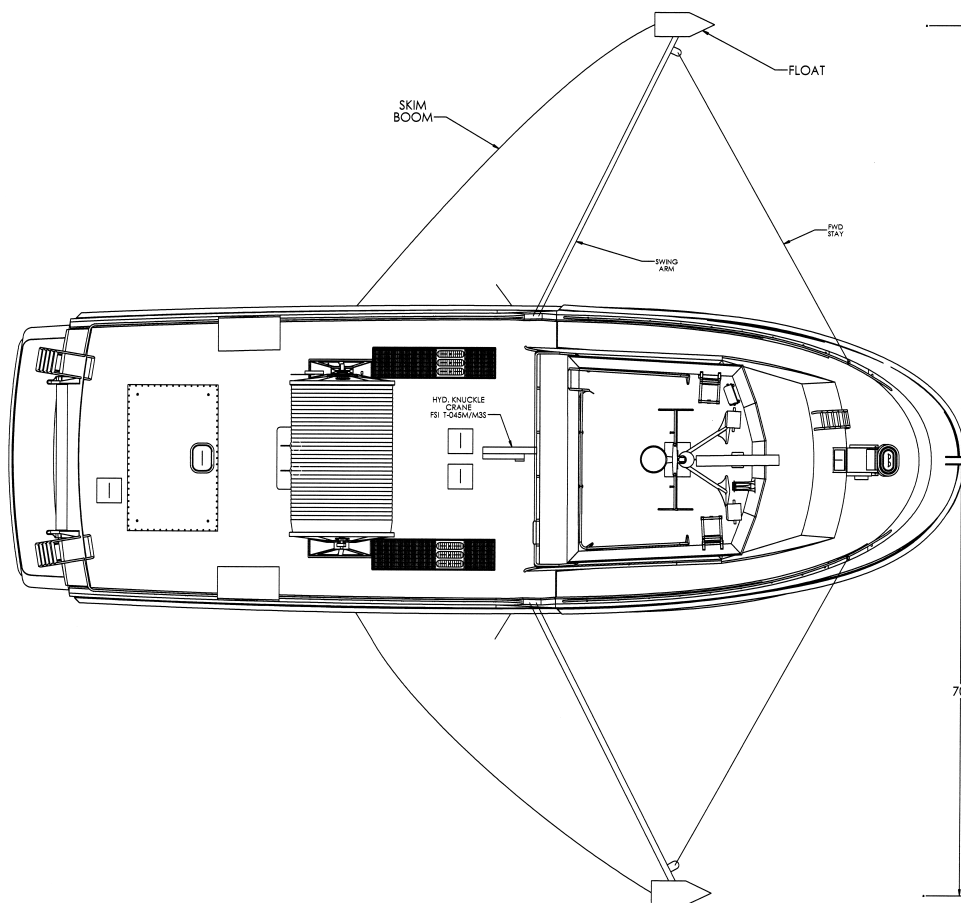

The Vessels will be in addition to the two 65' Mobile Skimmers, two 47' FRV Skimmers, and eight 249 BBL recovery barges WCMRC had previously purchased from Rozema Boat Works.

The 74' Mobile skimmers represent the largest and most capable oil skimmers designed and built by Rozema to date. Delivery of vessel # 1 will be March of 2019 and the second is scheduled for delivery in August 2019.

# Specifications

L.O.A	78' x 25'	23.77m x 7.62m
Molded Dimensions	72'6" x 24'	22m x 7.31m
Top Speed	23 knots	
Draft light ship	72"	
Recovered oil capacity	277 US BBL	
Boom Capacity	2000' Kepner 43" Reel Pack Ocean Boom	
Skimming	2 x 3 brush LAMOR skimmers integrated into the hull	
Offload Pump	Desmi DOP 250	
Main Power	2 x CAT C32 @ 1600 HP each	
Gears	2 x Twin Disc MGX 6620 RV	
Generators	2 x 40kW Northern Lights Generators	
Bow Thruster	16" Niad - Hydraulic	
Crane	Tomil T-045	

(360) 757 - 6004
